Bibliography on biological effects of electric and magnetic fields, 1980-1986

Includes index.
Supersedes: Bibliography on biological effects of electric and magnetic fields, 1980-1984
"BR181".
ISBN 0-7726-0584-X

1. Electric fields - Physiological effect - Bibliography. 2. Magnetic fields - Physiological effect - Bibliography. 3. Electromagnetic fields - Physiological effect - Bibliography. I. Title

Z7994.A5B74 1986 016.57419'17 C87-092004-9

TABLE OF CONTENTS

The bibliography is arranged in reverse chronological order (most recent year first) and within each year the citations are listed alphabetically by title.

Year of Citation	Page
1986	1
1985	3
1984	11
1983	18
1982	26
1981	30
1980	32
Author Index	35
Organization and Conference Index	42

This bibliography supersedes the Bibliography on Biological Effects of Electric and Magnetic Fields (1980-1984), published July 1984.

ATTENTION

This bibliography is being distributed outside B.C. Hydro for information purposes only. As most of the items listed are available from public and university libraries, please request them from those sources first.

Thank you.

1986

** 1. Association of paternal occupation with childhood cancer, by J. D. Sahl. American Journal of Epidemiology 123, No. 5 (1986), 921-922. Letter to the editor and the authors' reply.

** 2. Background radiation, electrical work, and some other exposures associated with acute myeloid leukemia in a case-referent study, by Ulf Flodin, Mats Fredriksson, Olav Axelson, Bodil Persson and Lennart Hardell. Archives of Environmental Health 41, No. 2 (1986), 77-84.

** 3. Behavioral monitoring of rats during exposure to air ions and DC electric fields, by William H. Bailey and Jonathan M. Charry. Bioelectromagnetics 7, No. 3 (1986), 329-339.

** 4. CRC handbook of biological effects of electromagnetic fields, edited by Charles Polk and Elliot Postow. Boca Raton: CRC Press, 1986. 503 pp.

** 5. Cancer in the electric power industry, by S. Tornqvist, S. Norell, A. Ahlbom, and B. Knave. British Journal of Industrial Medicine 43 (1986), 212-213.

** 6. Cardiovascular responses of cows given electrical current during milking, by R. C. Gorewit and N. R. Scott. Journal of Dairy Science 69, No. 4 (1986), 1122-27.

** 7. A case-control study of leukemia at a naval nuclear shipyard, by Frank B. Stern, Richard A. Waxweiler, James J. Beaumont, Shiu T. Lee et al. American Journal of Epidemiology 123, No. 6 (1986), 980-992.

** 8. Chronic 60-Hz electric field exposure-induced subtle bioeffects on hematology, by Y. J. Seto, D. Majeau-Chargois, J. R. Lymangrover, W. P. Dunlap, F. T. Fox and S. T. Hsieh. Environmental Research 39 (1986), 143-152.

** 9. Effects of 50 Hz electric currents on mood and verbal reasoning skills, by B. T. Stollery. British Journal of Industrial Medicine 43 (1986), 339-349.

** 10. The effects of long-term air ion and DC electric field exposures on survival characteristics in female NAMRU mice, by Edwin Welles Kellogg III and Michael George Yost. Journal of Gerontology 41, No. 2 (1986), 147-153.

** 11. Effects of sinusoidal 60-Hz electric and magnetic fields on ATP and oxygen levels in the slime mold, Physarum polycephalum, by M. T. Marron, E. M. Goodman, B. Greenebaum and P. Tipnis. Bioelectromagnetics 7, No. 3 (1986), 307-314.

** Entries preceded by a double asterisk are new additions since the 1980-1984 edition of this bibliography.

** 12. Electric field - biological systems interaction applied to animals and man, by Sol M. Michaelson. Veterinary and Human Toxicology 28, No. 1 (1986), 19-30.

** 13. Emerging issues in extremely-low-frequency electric and magnetic field health research, by Robert I. Kavet and Robert S. Banks. Environmental Research 39 (1986), 386-404.

** 14. Enhancing effect of low frequency pulsed electromagnetic fields on lectin-induced human lymphocyte proliferation, by M. Cantini, A. Cossarizza, F. Bersani, R. Cadossi et al. Journal of Bioelectricity 5, No. 1 (1986), 91-104.

** 15. The epidemiologist in court: some comments, by D. E. Lilienfeld and B. Black. American Journal of Epidemiology 123, No. 6 (1986), 961-964.

** 16. Exposure to electromagnetic fields and the risk of leukemia, by Kazim Sheikh. Archives of Environmental Health 41, No. 1 (1986), 56-63.

** 17. 50-Hz electromagnetic environment and the incidence of childhood tumors in Stockholm County, by Lennart Tomenius. Bioelectromagetics 7, No. 2 (1986), 191-207.

** 18. A health examination of railway high-voltage substation workers exposed to ELF electromagnetic fields, by P. Baroncelli, S. Battisti, A. Checcucci, P. Comba, M. Grandolfo, A. Serio and P. Vecchia. American Journal of Industrial Medicine 10 (1986), 45-55.

** 19. Intracellular recording during magnetic field application to monitor neurotransmitter release events: methods and preliminary results, by R. Gundersen, B. Greenebaum and M. Schaller. Bioelectromagnetics 7, No. 3 (1986), 271-281.

** 20. In vitro exposure to electromagnetic fields: changes in tumour cell properties, by Jerry L. Phillips, Wendell D. Winters and Loyce Rutledge. International Journal of Radiation Biology 49, No. 3 (1986), 463-469.

** 21. Magnetic field effects on the rat pineal gland: role of retinal activation by light, by S. Reuss and J. Olcese. Neuroscience Letters 64, No. 1 (1986), 97-101.

** 22. Measurement of small mechanical vibrations of brain tissue exposed to extremely low-frequency electric fields, by R. J. Spiegel, J. S. Ali, J. F. Peoples and W. T. Joines. Bioelectromagnetics 7, No. 3 (1986), 295-306.

** Entries preceded by a double asterisk are new additions since the 1980-1984 edition of this bibliography.

** 23. Mitogen dose-dependent effect of weak pulsed electromagnetic field on lymphocyte blastogenesis, by P. Conti, G. E. Gigante, M. G. Cifone, E. Alesse, C. Fieschi, M. Bologna and P. V. Angeletti. FEBS Letters 199, No. 1 (1986), 130-134.

** 24. Motility of cultured fish epidermal cells in the presence and absence of direct current electric fields, by Mark S. Cooper and Manfred Schliwa. Journal of Cell Biology 102 (1986), 1384-1399.

** 25. Mortality of persons resident in the vicinity of electricity transmission facilities, by M. E. McDowall. British Journal of Cancer 53 (1986), 271-279.

** 26. Possible effects of electric blankets and heated waterbeds on fetal development, by Nancy Wertheimer and Ed Leeper. Bioelectromagnetics 7, No. 1 (1986), 13-22.

** 27. Pulsed electromagnetic fields and normal chick development, by Betty F. Sisken, Ira Fowler, Chris Mayaud, John P. Ryaby, James Ryaby and Authur A. Pilla. Journal of Bioelectricity 5, No. 1 (1986), 25-34.

** 28. Risk research: when should we say "enough"? by M. Granger Morgan. Science 232, No. 4753, 23 May 1986, 917.

** 29. 60-Hz electric-field effects on pineal melatonin rhythms: time course for onset and recovery, by B. W. Wilson, E. K. Chess and L. E. Anderson. Bioelectromagnetics 7, No. 2 (1986), 239-242.

** 30. A survey of cancer and occupation in young and middle aged men II: Non-respiratory cancers, by D. Coggon, P. Pannett, C. Osmond, and E. D. Acheson. British Journal of Industrial Medicine 43 (1986), 381-386.

** 31. Transmission and distribution in the United States: "A Look Ahead", by Wallace B. Behnke. IEEE Power Engineering Review May 1986, 3-5.

1985

** 32. Analysis of BPA occupational electric field exposure data: final report, by T. Dan Bracken, U.S. Bonneville Power Administration, 1985. DOE/BP/36303-1. vp.

** 33. Animal studies on electric field effects: R&D status report, by Robert M. Patterson. EPRI Journal 10, No. 5 (1985), 52-53.

** Entries preceded by a double asterisk are new additions since the 1980-1984 edition of this bibliography.

** 34. Assessments and viewpoints on the biological and human health effects of extremely low frequency (ELF) electromagnetic fields: compilation of commissioned papers for the ELF Literature Review Project. Washington: American Institute of Biological Sciences, 1985. 461 pp.

** 35. Behavioral studies of dairy cow sensitivity to AC and DC electric currents, by Robert J. Gustafson, Thomas M. Brennan, and Robert D. Appleman. American Society of Agricultural Engineers Transactions 28, No. 5 (1985), 1680-1685.

** 36. Behavioral studies with electromagnetic fields: implications for psychobiology, by Rochelle Medici. Journal of Bioelectricity 4, No. 2 (1985), 527-552.

** 37. Bioelectrical research in Italy, by Ruggeres Cadossi. Journal of Bioelectricity 4, No. 1 (1985), 143. Editorial.

** 38. Biological and human health effects of extremely low frequency electromagnetic fields: post-1977 literature review. Arlington: American Institute of Biological Sciences, 1985. Report of the Committee on Biological and Human Health Effects of Extremely Low Frequency Electromagnetic Fields. 328 p.

** 39. Biological effects of electric fields on agricultural animals, by H. Dwight Mercer. Veterinary and Human Toxicology 27, No. 5 (1985), 422-426.

** 40. Biological effects of extremely low frequency electromagnetic fields, by J.M.R. Delgado. Journal of Bioelectricity 4, No. 1 (1985), 75-91.

** 41. Biological effects of high-frequency electromagnetic fields on Salmonella typhimurium and Drosophila melanogaster, by Yngve Hamnerius, Åsa Rasmuson, and Bertil Rasmuson. Bioelectromagnetics 6, No. 4 (1985), 405-414.

42. Biological effects of overhead electric transmission lines: a technical or a social issue? by Scott A. Smith. Right of Way February 1985, 6-9.

** 43. Cancer among workers exposed to strong static magnetic fields, by Lars Barregard, Bengt Jarvholm and Eugen Ungethum. The Lancet Oct. 19, 1985, p. 892. Letter to the editor.

** 44. Chromosomal aberrations induced by ELF electric fields, by G. d'Ambrosio, A. Scaglione, D. Di Berardino and M. B. Lioi. Journal of Bioelectricity 4, No. 1 (1985), 279-284.

** Entries preceded by a double asterisk are new additions since the 1980-1984 edition of this bibliography.

** 45. Chronic electromagnetic stressors in the environment: a risk factor in human cancer, by Andrew A. Marino and Don M. Morris. Journal of Environmental Science and Health C3, No. 2 (1985), 189-219.

** 46. Classical psychophysics and ELF magnetic field detection, by M. A. Persinger. Journal of Bioelectricity 4, No. 2 (1985), 577-584. Letter.

** 47. Comments on variables in research involving electromagnetic bio-effects, by W. C. Parkinson. Journal of Bioelectricity 4, No. 2 (1985), 585-587.

** 48. Constant magnetic field influence on passive electrical properties of red blood cells, by M. S. Markov and F. Pliquett. Bioelectrochemistry and Bioenergetics 14 (1985), 495-502.

** 49. Corona and field effects of AC overhead transmission lines: information for decision makers. IEEE Power Engineering Society. 1985. 62 pp.

50. Current densities measured in human models exposed to 60-Hz electric fields, by W. T. Kaune and W.C. Forsythe. Bioelectromagnetics 6, No. 1 (1985), 13-32.

** 51. Current problems of nonionizing radiation, by Nikolai F. Izmerov. Scandinavian Journal of Work, Environment & Health 11 (1985), 223-227.

** 52. A cytohistological analysis of roots whose growth is affected by a 60-Hz electric field, by Annie Brulfert, Morton W. Miller, Dominique Robertson, David A. Dooley and Peter Economou. Bioelectromagnetics 6, No. 3 (1985), 283-291.

** 53. Design, construction, and testing of a DC bioeffects enclosure for small animals, prepared by Battelle Pacific Northwest Laboratories. EPRI EA-4189, July 1985. vp.

** 54. Destruction of human hemoglobin in the presence of water and negative air ions generated by corona discharge, by S. C. Goheen, M. G. Bissell, G. A. Rao and E. C. Larkin. International Journal of Biometeorology 29, No. 4 (1985), 353-359.

55. Developmental effects of chronic electric field exposure in rats, by Don N. Rommereim, William T. Kaune, Ray L. Buschbom, Richard D. Phillips and Melvin R. Sikov. Proceedings of the Society for Experimental Biology and Medicine 178, No. 1 (1985), 171.

** 56. Effect of electromagnetic fields on two calcium dependent biological systems, by Pio Conti, G. E. Gigante, M. G. Cifone and E. Alesse. Journal of Bioelectricity 4, No. 1 (1985) 227-236.

** Entries preceded by a double asterisk are new additions since the 1980-1984 edition of this bibliography.

** 57. Effect of low-frequency low-energy pulsing electromagnetic fields on the response to lectin stimulation of human normal and chronic lymphocytic leukemia lymphocytes, by G. Emilia, G. Torelli, G. Ceccherelli, and A. Donelli. Journal of Bioelectricity 4, No. 1 (1985), 145-161.

58. Effects of electric field exposure on some indices of CNS arousal in the mouse, by R. P. Blackwell and A. L. Reed. Bioelectromagnetics 6, No. 1 (1985), 105-107.

** 59. Effects of electric field near 750 kV transmission line and protection against their harmful consequences, by M. Paulusz. IEE International Conference on Electric and Magnetic Fields in Medicine and Biology 4 - 5 December 1985. pp. 108-111.

** 60. The effects of high-voltage transmission lines on honeybees, prepared by Bioconcern and IIT Research Institute. EPRI EA-3898, May 1985. vp.

** 61. Effects of 60-Hz electric fields on embryo and chick development, growth and behaviour, prepared by Westinghouse Electric Corporation and the Pennsylvania State University. EPRI EA-4161, July 1985. vp.

** 62. Effects of 60-Hz electric fields on living plants exposed for extended periods, prepared by Westinghouse Electric Corporation and the Pennsyvania State University. EPRI EA-4159, July 1985. vp.

** 63. Electrical and biological effects of transmission lines: a review, prepared by the Biological Studies Task Team. U.S. Bonneville Power Administration, 1985. 84 pp.

** 64. The electric impedance of the human body, by Gottfried Biegelmeier. Revue Generale de l'Electricite 11 (1985), 817-832.

** 65. Epidemiological studies on effects of exposure to ELF electromagnetic fields, by Bengt G. Knave and Siv G. Tornqvist. UNIPEDE Paper 85E90.2, 9 - 14 June 1985. 11 pp.

** 66. Evaluating compliance with FCC-specified guidelines for human exposure to radiofrequency radiation. U. S. Federal Communications Commission, Office of Science and Technology OST Bulletin No. 65 October 1985. 52 pp.

67. An evaluation of published studies analyzing the association of carcinogenesis with exposure to magnetic fields, by H. Daniel Roth Associates, Inc. March, 1985. EPRI EA-3904.

68. Evaluation of the effects of electric fields on implanted cardiac pacemakers, by A. J. Moss and E. Carstensen. University of Rochester, 1985. EPRI EA-3917.

** Entries preceded by a double asterisk are new additions since the 1980-1984 edition of this bibliography.

** 69. Experimental studies of the effects of high voltage transmission lines on cows, by Jan Hultgren. Swedish University of Agricultural Sciences Project 45/39. Project Memo 1985-07-25. 17 pp.

70. Exposure to transmission line electric fields during farming operations, by Mike Silva and Dennis Huber. IEEE Power Engineering Society Winter Meeting 1985, Paper 85 WM 222-5. 9 pp.

** 71. Extra-high voltage transmission lines: mechanisms of biological effects on honeybees, prepared by Bioconcern and IIT Research Institute. EPRI EA-4218, August 1985. vp.

** 72. Growth rate and mitotic index analysis of Vicia faba L. roots exposed to 60-Hz electric fields, by M. Inoue, Morton W. Miller, Christopher Cox and E. L. Carstensen. Bioelectromagnetics 6, No. 3 (1985), 293-303.

73. Health of workers exposed to electric fields, by D. E. Broadbent, M.H.P. Broadbent, J. C. Male and M.R.L. Jones. British Journal of Industrial Medicine 42, No. 2 (1985), 75-84.

74. Histologic study of the internal organs of rats chronically exposed to a high-intensity electric field, by Y. J. Seto, D. Majeau-Chargois, J. R. Lymangrover, W. P. Dunlap and S. T. Hsieh. Journal of Environmental Science and Health. Part A: Environmental Science and Engineering A20, No. 1 (1985), 73-85.

** 75. Human reactions to transient electric currents: summary report prepared by the Johns Hopkins University for the Canadian Electrical Association and the Maryland Power Plant Siting Program. CEA 116 T 260. vp. October 1985. Summary of 3-year study.

** 76. IEE Colloquium on "Electromagnetic Interference and Cardiac Pacemakers", co-sponsored by the Biological Engineering Society, the British Pacing Group and the Hospital Physicists' Association, held on Tuesday, 22 January 1985 in London. IEE Digest No. 1985/7. 54 p.

** 77. An impedance method to calculate currents induced in biological bodies exposed to quasi-static electromagnetic fields, by John F. Deford and Om P. Gandhi. IEEE Transactions on Electromagnetic Compatibility EMC-27, No. 3 (1985), 168-173.

** 78 Interactions between weak electromagnetic fields and biosystems: a summary of nine years of research, by M. Grattarola, A. Chiabrera, R. Viviani and G. Parodi. Journal of Bioelectricity 4, No. 1 (1985), 211-225.

** Entries preceded by a double asterisk are new additions since the 1980-1984 edition of this bibliography.

** 79. Introduction: the role of Working Group No. 4 of Study Committee No. 64 of the International Electrotechnical Commission. Revue Generale de l' Electricite 11 (1985), 803-808.

** 80. Ion currents and fields of HVDC test lines, by Li Fu-shou, Ni Zuo, Han Zhen-dong and Xiao Pin-de. Proceedings of the International Conference on Gas Discharges & Their Applications (1985), 428-430.

81. Leukemia in electrical workers in New Zealand, by N. E. Pearce, R. A. Sheppard, J. K. Howard, J. Fraser and B. M. Lilley. Lancet April 6, 1985, 811-812.

** 82. Leukemia in occupational groups with presumed exposure to electrical and magnetic fields, by Eugenia E. Calle and David A. Savitz. New England Journal of Medicine 313, No. 23 (1985), 1476-1477. Letter to the editor.

** 83. Leukemia risk among U. S. white male coal miners: a case-control study, by Priscilla A. Gilman, Richard G. Ames and Michael A. McCawley. Journal of Occupational Medicine 27, No. 9 (1985), 669-671.

84. Low-voltage ELF electric field measurements in ionic media, by R. Gundersen and B. Greenebaum. Bioelectromagnetics 6, No. 2 (1985), 157-168.

85. Maryland doctor claims death certificate study links electromagnetic exposure and brain tumors. Electric Light and Power Jan. 1985, 28.

86. Magnetic coupled longitudinal electric field measurements on two transmission lines, by M. J. Frazier and J. Dabkowski. IEEE Transmission on Power Apparatus and Systems PAS-104, No. 4 (1985), 933-940.

** 87. Milk production, health, behaviour, and endocrine responses of cows exposed to electrical current during milking, by D. V. Henke Drenkard, R. C. Gorewit, N. R. Scott, and R. Sagi. Journal of Dairy Science 68, No. 10 (1985), 2694-2702.

** 88. The mind fields (Jose Delgado's experiments on animal behaviour in electromagnetic fields), by Kathleen McAuliffe. Omni 7 (Feb. 1985), 41-44, 96, 98, 100-104.

89. Mortality experience of electrical engineers, by R. Olin, D. Vagero and A. Ahlbom. British Journal of Industrial Medicine 42, No. 3 (1985), 211-212.

** 90. Mortality in workers exposed to electromagnetic fields, by Samuel Milham Jr. Environmental Health Perspectives 62 (1985), 297-300.

** Entries preceded by a double asterisk are new additions since the 1980-1984 edition of this bibliography.

** 91. Neuroblastoma and paternal occupation: a case-control analysis, by Margaret R. Spitz and Christine Cole Johnson. American Journal of Epidemiology 121, No. 6 (1985), 924-929.

** 92. Numerical calculation and measurement of 60-Hz current densities induced in an upright grounded cylinder, by W. T. Kaune and F. A. McCreary. Bioelectromagnetics 6, No. 3 (1985), 209-220.

93. Occupational exposure to electromagnetic fields and the occurrence of brain tumors: an analysis of possible associations, by Ruey S. Lin, Patricia C. Dischinger, Jose Conde and Katherine P. Farrell. Journal of Occupational Medicine 27, No. 6 (June 1985), 413-419.

94. People in alternating electric and magnetic fields near electric power equipment, by W. T. Norris, J. C. Male, B. J. Maddock and J. A. Bonnell. Electronics & Power February 1985, 137-141.

** 95. Polychlorinated biphenyls in the blood of personnel from an electric utility, by Jack D. Sahl, T. Timothy Crocker, Robert J. Gordon and Edward J. Faeder. Journal of Occupational Medicine 27, No. 9 (1985), 639-643.

** 96. Possible biological effects of 50-Hz electric fields: a progress report, by R. Conti and P. Nicolini. Journal of Bioelectricity 4, No. 1 (1985), 177-193.

** 97. Powerline frequency electric and magnetic fields: a pilot study of risk perception, by M. Granger Morgan, Paul Slovic, Indira Nair, Dan Geisler et al. Risk Analysis 5, No. 2 (1985), 139-149.

** 98. Present state of knowledge regarding biological effects of magnetic, electric, and electromagnetic fields, as well as of natural radioactivity in indoor air, by R. Reiter. International Journal of Biometeorology 29, supplement 2 (1985), 115-137.

** 99. Pulsed electromagnetic fields promote collagen production in bone marrow fibroblasts via athermal mechanisms, by Richard W. Farndale and J. Clifford Murray. Calcified Tissue International 37 (1985), 178-182.

** 100. Pulsed magnetic field exposure during pregnancy and implications for NMR foetal imaging: a study with mice, by D. McRobbie and M. A. Foster. Magnetic Resonance Imaging 3 (1985), 231-234.

** 101. The relationship between sensitivity to 60-Hz electric fields and induced transmembrane potentials in plants root cells, by M. Inoue, M. W. Miller, E. L. Carstensen and A. A. Brayman. Radiation and Environmental Biophysics 24 (1985), 303-314.

** Entries preceded by a double asterisk are new additions since the 1980-1984 edition of this bibliography.

** 102. Reply to: Comments on variables in research involving electromagnetic bioeffects, by Robert O. Becker. Journal of Bioelectricity 4 No. 2 (1985), 589-590. Letter.

** 103. The responses of cells to electrical fields: a review, by Kenneth R. Robinson. Journal of Cell Biology 101 (1985), 2023-2027.

** 104. Responses of dairy cows to alternating electrical current administered semirandomly in a nonavoidance environment, by R. C. Gorewit, N. R. Scott and C. S. Czarniecki. Journal of Dairy Science 68 (1985), 718-725.

** 105. Retardation of embryogenesis by extremely low frequency 60 Hz electromagnetic fields, by Ivan L. Cameron, Keithley E. Hunter and Wendell D. Winters. Physiological Chemistry and Physics and Medical NMR 17 (1985), 135-138.

106. Risk factors for ocular melanoma: western Canada melanoma study, by Richard P. Gallagher, J. Mark Elwood, Jack Roofman, John J. Spinelli, G. B. Hill, W. J. Threlfall and Judy M. Birdsell. Journal of the National Cancer Institute 74, No. 4 (April 1985), 775-78.

** 107. Sensitivity of the human eye to power frequency electric fields, by E. L. Carstensen, A. Buettner, V. L. Genberg and M. W. Miller. IEEE Transactions on Biomedical Engineering BME-32, No. 8 (1985), 561-565.

108. "Silent Keys": leukaemia deaths, by J. Seager and Robert D. Currier. Letters to the editor. The Lancet May 11, 1985, 1095-1096.

109. Silent Keys: leukaemia mortality in amateur radio operators, by Samuel Milham Jr. Lancet April 6, 1985, 812.

** 110. Source of stray voltage and effect on cow health and performance, by R. D. Appleman and R. J. Gustafson. Journal of Dairy Science 68, No. 6 (1985), 1554-1567.

111. Special Report: Power-line fields and human health, by M. Granger Morgan, H. Keith Florig, Indira Nair and David Lincoln. IEEE Spectrum 22, No. 2 (February 1985), 62-68.

** 112. Study of electric fields and ion effects of HVDC lines, prepared by General Electric's High Voltage Transmission Research Facility. U. S. Department of Energy DOE/RA/50133-T1. NTIS DE86-002465, August 1985. vp.

** 113. Transmission of electric power at ultra-high voltages: current status and future prospects, by Harold N. Scherer and Gregory S. Vassell. IEEE Proceedings 73, No. 8 (1985), 1252-1278.

** Entries preceded by a double asterisk are new additions since the 1980-1984 edition of this bibliography.

** 114. Ventricular fibrillation of the heart induced by electric current, by J. Weirich, K. Haverkampf and H. Antoni. Revue Generale de l'Electricite 11 (1985), 833-843.

** 115. White light-electromagnetic field interaction causes a localized destruction of cultured hela cells, by R. Y. Alvarez, L. Rivas, C. Rius and Y. Valladares. Cancer Letters 29, No. 3 (1985), 331-338.

1984

116. Action of constant and low-frequency magnetic fields on biological systems, by L. A. Piruzyan and A. N. Kuznetsov. Biology Bulletin of the Academy of Sciences of the USSR 10, No. 6 (1984), 449-61.

117. An activity systems model for estimating human exposure to 60 Hz electric fields, by Mike Silva, Luciano Zaffanella and Norm Hummon. IEEE Power Engineering Society Summer Meeting 1984, paper 84 SM 671-4. 7 pp.

118. An assessment of the 5-mA 60-Hz contact current safety level, by Robert S. Banks and Tieu Vinh. IEEE Transactions on Power Apparatus and Systems PAS-103, No. 12 (1984), 3608-3614.

119. Assessment of the immune responsiveness of mice exposed to a 1.5-Tesla stationary magnetic field, by T. S. Tenforde and M. Shifrine. Bioelectromagnetics 5, No. 4 (1984), 443-446.

120. Attempts to produce taste-aversion learning in rats exposed to 60-Hz electric fields, by J. A. Creim, R. H. Lovely, W. T. Kaune and R. D. Phillips. Bioelectromagnetics 5 (1984), 271-282.

121. BPA study of occupational exposure to 60-Hz electric fields, by V. L. Chartier; T. Dan Bracken and A. S. Capon. IEEE Transactions on Power Apparatus and Systems PAS-104, No. 3, March 1985, 733-744.

** Entries preceded by a double asterisk are new additions since the 1980-1984 edition of this bibliography.

370. Biomedical effects associated with energy transmission systems: effects of 60-Hz electric fields on Circadian and Ultradian physiological and behavioral functions in small rodents, by C. F. Ehret et al. Argonne: Argonne National Laboratory, 1980. 80 pp.

371. Cardiovascular response of rats exposed to 60 Hz electric fields, by D. I. Hilton and R. D. Phillips. Bioelectromagnetics 1, No. 1 (1980), 55-64.

372. Chronic exposure to a 60-Hz electric field: effects on synoptic transmission and peripheral nerve function in the rat, by R. A. Jaffe et al. Bioelectromagnetics 1 (1980), 131-147.

373. Comparison of the coupling of grounded humans, swine and rats to vertical, 60 Hz electric fields, by W. T. Kaune and R. D. Phillips. Bioelectromagnetics 1, No. 2 (1980), 117-129.

374. Do high-voltage overhead lines affect the health of residents? by A. F. Koopman. Elektrotechniek (Netherlands) 58, No. 6 (1980), 379-382.

375. The effect of air ionization, electric fields, atmospherics and other electric phenomena on man and animal, by F. G. Sulman. Springfield: Charles C. Thomas, 1980. 389 pp.

376. The effect of electric and magnetic fields near an HVDC converter terminal on implanted cardiac pacemakers, by the IIT Research Institute. Palo Alto: Electric Power Research Institute, 1980. 90 pp.

377. Electric and magnetic fields produced by transmission systems: description of phenonema, by the CIGRE Working Group 36.01 (Interference and Fields). Paris: International Conference on Large High Voltage Electric Systems, 1980. 139 pp.

378. Electrical fields, calcium gradients, and cell growth, by Kenneth R. Robinson and Colin McCaig. Annals of the New York Academy of Sciences 339 (1980), 132-138.

379. Electrical wiring configurations and childhood leukemia in Rhode Island, by John P. Fulton et al. American Journal of Epidemiology III, No. 3 (1980), 292-296.

380. Impact analysis of electrical transmission lines, by W. R. Kellough. Right of Way, Dec. 1980, 19-25.

381. An interview with Dr. Valery Popkov, member of the Soviet Academy of Sciences, discussing the need for 1,150 kV transmission lines in the Soviet Union and "false alarms" about electric fields. Translated from Vi i Vattenfall 33, No. 8 (1980).

** Entries preceded by a double asterisk are new additions since the 1980-1984 edition of this bibliography.

382. Long-term biological effects of very intense 60 Hz electric field on mice, by Wagih Z. Fam. IEEE Transactions on Biomedical Engineering BME-27, No. 7 (1980), 376-381.

383. Nonionizing electromagnetic radiation safety: a program of coordinated federal activities related to biological effects of nonionizing electromagnetic radiation (0-300 GHz), by the Interagency Task Force on Biological Effects of Nonionizing Electromagnetic Radiation. Washington: National Telecommunications and Information Administration, 1980. 75 pp.

384. Power frequency electric field induces biological changes in successive generations of mice, by A. A. Marino et al. Experientia 36 (1980), 309-311.

385. A study of farm animals near 765 kV transmission lines, by Harold E. Amstutz and David B. Miller. New York: American Electric Power Service Corporation, 1980. 31 pp.

386. A study of possible effects of high-intensity 60 Hz electric fields on primate behaviour, by C. S. Feldstone and R. J. Spiegel. IEEE Region V Conference Digest (1980), 21-24.

387. What are the effects of electrical and magnetic fields on man? by Jean Cabanes. (Paper given at a joint meeting of CIGRE Study Committees 23 and 36, Madrid 1979.) Revue Generale d'Electricite 89, No. 1 (1980), 16-22.

** Entries preceded by a double asterisk are new additions since the 1980-1984 edition of this bibliography.

Zubko, V. M. 183
Zuo, Ni 80

ORGANIZATION AND CONFERENCE INDEX

Aerospace Corporation 201
American Association for the Advancement of Science 293
American Association of Physical Anthropologists 172
American Chemical Society 308
American Electric Power Service Corporation 385
American Institute of Biological Sciences 34, 38
American Medical Association 141
American Power Conference 1983 273
American Society of Agricultural Engineers 35, 132, 178, 179, 191, 284, 365
American Veterinary Medical Association 185
Argonne National Laboratory 370
Associates in Rural Development 307
Australian Neuroscience Society 217

Battelle Memorial Institute. Pacific Northwest Laboratories 53, 202 233, 309, 312, 346, 349
Bioconcern 60, 71, 353
Bioelectromagnetic Society 309
Biological Engineering Society 76
British Pacing Group 76

Canadian Electrical Association 75, 173, 233
CIGRE 1984 Session 161
CIGRE Symposium on Transmission Lines and the Environment 1981 366
CIGRE Working Group 36.01 (Interference) 150, 325, 377, 387
Colloquium on "Some Biological Effects of Electric and Magnetic Fields" 295, 33
Colstrip Project 204
Conference on Recent Developments in Electrical Utility Research 136, 154

Dames and Moore 341

Electric Power Research Institute 54, 60, 61, 62, 68, 71, 130, 214, 317, 348, 353, 355, 376

Foreign Broadcast Information Service 226, 310

Garrison-Spokane HVTL 204
General Electric Company 112, 187

H. Daniel Roth Associates, Inc. 67
Hospital Physicists' Association 76

IEE Colloquium on "Electromagnetic Interference and Cardiac Pacemakers" 76
IEE International Conference on Electric and Magnetic Fields in Medicine and Biology, 4-5 Dec. 1985 59
IEEE-ESMO Conference 1983 215
IEEE National Symposium on Electromagnetic Compatibility 1984 163
IEEE Power Engineering Society 49
IEEE Power Engineering Society Summer Meeting 1982 313
IEEE Power Engineering Society Summer Meeting 1983 195, 296
IEEE Power Engineering Society Summer Meeting 1984 117, 166
IEEE Power Engineering Society Winter Meeting 1982 342
IEEE Power Engineering Society Winter Meeting 1983 229, 262, 269
IEEE Power Engineering Society Winter Meeting 1984 145, 168, 169
IEEE Power Engineering Society Winter Meeting 1985 70
IEEE Region V Conference 1980 386
IIT Research Institute 60, 71, 376
Institution of Electrical Engineers 295
Institution of Electrolic and Radio Engineers 348
Interagency Task Force on Biological Effects of Nonionizing Electromagnetic Radiation 383
International Conference on Gas Discharges and their Applications 80
International Electrotechnical Commission 79
International Society for Chronobiology 246
International Symposium on Occupational Health and Safety in Mining and Tunnelling 1982 315
Italy-USA Joint Workshop on Ultra High Voltage Transmission Technology 1982 320, 321, 322

Johns Hopkins University 75

Kobe University, Facility of Engineering 208

Leo Kanner Associates 344

Maryland Power Plant Siting Program 75
McGill University 131
Michigan Legislative Science Office 138
Michigan State University 297
Mid-Continent Area Power Pool 337
Minnesota Environmental Quality Board 278, 324
Montana Dept. of Natural Resources and Conservation 204, 268
MVEA Engineering Conference 1983 228

National Academy of Sciences USA 174
National Technical Information Service 112, 196, 202, 216, 218, 235, 248, 264, 285, 312, 367
New York Department of Public Service 256
New York State Power Lines Project 130
Norway State Institute of Radiation Hygiene 347

Pennsylvania State University 61, 62

Randomline Inc. 196

Shah and Associates 316
Sigma Associates 337
Society for Experimental Biology and Medicine 55, 176
Southwest Research Institute 282
Soviet Academy of Sciences 381
State University of New York 318
Swedish Cancer Environment Registry 249
Swedish University of Agricultural Sciences 69
Symposium on Environmental Epidemiology 1984 171

Tennessee Valley Authority 285

UNIPEDE 65, 304
University of California, Lawrence Berkeley Lab 216
University of Pittsburgh 171
University of Rochester 68, 367
University of Waterloo 173
U.S. Bonneville Power Administration 32, 63, 126, 233, 240, 314, 344
U.S. Department of Energy 112, 130, 187, 196, 201, 214, 242, 282, 285, 341
U.S. Federal Communications Commission 66
U.S. National Bureau of Standards 134, 144
U.S. National Institute for Occupational Safety and Health 264
U.S. National Telecommunications and Information Administration 383
U.S. Naval Aerospace Medical Research Lab 235
USSR Report 226, 310

Westinghouse Electric Corporation 61, 62
World Health Organization 333
